

# FILM IN A YEAR PROJECT

## “The Community Theater for Filmmaking”

1. At the start of your video state your full name, age, height and what character you are auditioning for.
2. Read through each side on camera doing your best job to portray the character while having someone else read the lines opposite yours off screen (how well your off screen partner reads will not affect you)
3. Position the camera to get a front facing medium shot of you (from the top of your head to just below your chest)
4. Submit a separate video for each character you want to audition for
5. Videos MUST be shorter than 3min
6. Videos MUST be uploaded to YouTube and titled as follows when you upload to YouTube “Film in a Year Auditions 2014 – CHARACTER – YOUR FULL NAME”
7. Submit your audition video at <http://FilmInAYear.com/submit>

MR. NICHOLS

23 EXT. HIGH SCHOOL - SCIENCE CLASS - DAY

23

Tim is in Science class dozing. Still looking sick. His hood is up.

Mr. Nichols is teaching on parasites. The room is low-lit, and the projector shines displaying the creepy images in all of their glory.

Kyle and Declan are whispering in the back of the class.

KYLE

I can't believe he lost us another game and now he looks even worse.

DECLAN

Yeah, at this rate we are gonna get killed this weekend too.

MR. NICHOLS sees Tim has his head down.

MR. NICHOLS

Ahem, Mr. Harker please take your hood off and pay attention.

Tim is out of it.

MR. NICHOLS

( Annoyed )

Mr. HARKER!

TIM

( Startled )

AHH. Yes, Mr. Nichols.

MR. NICHOLS

Please, take your hood off and pay attention.

TIM

Sure, sorry.

A bit of laughter from the room.

MR. NICHOLS

As I was saying parasites come in all sizes and shapes. They effect all kinds of animals. Many species have different defenses for fighting them off.

Mr. NICHOLS shows a slide of some gross worm parasites. The class moans in unison.

Tim strangely fixated.

MR. NICHOLS

Animals are also known to resort to behavioral defenses. For example, sheep avoid open pastures during spring, when roundworm eggs hatch and fruit flies ingest alcohol by eating fermented fruit as self-medication against blood-borne parasites.

KYLE

Me To.

The jocks chuckle.

MR. NICHOLS

Ahem, Humans fight parasites with our Immunoglobulin E antibodies.

TIM POV:

There are orange spots happening in Tim's eyes.

Then a flash of light and several sensors read-outs appear filling his view with an assortment of data types in an alien language. His HUD(heads up display).

Information popping up on the parasites from the projector.

BACK TO SCENE:

TIM

AHHH. What the..

Tim swings his arms at the HUD.

TIM POV:

The HUD is targeting and scanning everything around him.

BACK TO SCENE:

The class is watching Tim freaking out, whispering to each other. The slide is of Blood cells being attacked by blood parasites.

MR. NICHOLS

Mr. Harker it's not that scary really. It's just a blood cell.

TIM

What is this!

Tim's POV:

A map opens up and shows his position

BACK TO SCENE:

Tim is shocked and falls out of his chair. The class is laughing now.

MR. NICHOLS

Mr. HARKER. I told you it's just a blood cell. Now return to you seat and sit quietly.

Tim ignoring him. Tim covers his Eyes.

TIM POV:

The HUD on a mostly black background.

TIM

Make it stop. Make it stop.

BACK TO SCENE:

Tim is in the fetal position. Kyle and Declan are laughing it up.

MR. NICHOLS

Mr. Harker I think you need to see the nurse.

Tim POV:

The HUD slides to the corner of Tim's Vision.

MR. NICHOLS is being scanned and all sorts of read outs are popping up.

TIM

( Unnerved)

Uh, OK....I think your right.

BACK TO SCENE:

Kyle whispering to Declan the both laugh shaking their heads.

Kyle motions smoking pot to Tim. Tim glares at him.

Devin looks on with intrigue.

Tim has trouble lifting his backpack. Gets up and leaves the class.
